

mk-today

the week

- this is the first week we'll record everything. Have independent audio recorded on different machines
 - mac pro gets logic?
 -

tasks

[-mk-project-cards](#)

- bot thinking
 - which ones run where?
 - moment-bot on pro
 - studio-bot on studio
 - smaller temp ai bots on minis t

- [mk-moment-bot-steps-20231010-20231013](#)
- [getting started with vercel postgres](#)
- more gear for charrise
- function calling in the api
- prep for map workshop
 - mount projectors
 - print basemaps

- print concept cards/buttons
- get out stacks of supplies
- need to get moment bot to summarize by the minute
 - save minutes to a base
 - query last 5 for summary
 - and in each have a meta summary for context
- think quick about the bot group?
 - elle-l-bot is the mk assistant?
 - template-bot is just the template--keep it thin
 - marx-bot is the character.ai-ish example
 - moment-bot reports on moments, handles storytelling about the space
 - studio-bot does what? gathers stills?
 -

projects

bots

- the list
 - moment-bot
 - elle-l-bot
 - template-bot
 - marx-bot
- next
 - function calling on moment bot
 - add tasks to do-your-work-bot (with opeen ai?)
 -

II conceptual tools

- [mk-notes-on-rubin-music-and-ai](#)

ai workshops

- [gage-report](#)
- [script for trainings](#)

mk galleries

- [mk-week-20230929](#)
- [mk-gallery-20231002-20231006](#)
- [event-lab-images-20230925-psy1816](#)
- [daily-images-20230921](#) = largely from AJ Gold's class
- [haa81-student-pitches](#)
