eventLab Event Processing Workflow

background

How do we set the workshop leaders up for success? we want to develop more patterns around our usual 'nice to haves'

Feature Requests

- Intro to a workshop - really quickly getting that as a handout, and then a printed version that looks good for students to leave with even

- Post workshop debrief+reflection recording to doc

- constant transcripts throughout, moved and stored to folder dedicated to workshop?

- clearer audio for all speakers

mk notes

- for live recording, engineer multiviews without frames or overlays

-

Messy notes
